

CS0134 Final Project – Due 12/04/2014

Set up a new web page for the subject of your choice in a new folder on your unixs.cis.pitt.edu domain called final.

It must contain an index.htm and two other htm files (for a minimum total of 3 pages/files). These pages are to utilize (at minimum) one style sheet for all formatting – the style sheet file must be contained in a folder called styles.

All images must be in a folder called images (except for the FAVICON (also required)).

All pages must be validated with less than 4 errors per page and the style sheet must also be validated.

Validator for web pages: <http://validator.w3.org/>

Validator for css files: <http://jigsaw.w3.org/css-validator/>

Summary of point requirements for the assignment:

Index.htm validated	25 points
Page2.htm validated	25 points
Page3.htm validated	25 points
Stylesheet validated	25 points
FAVICON	10 points
Images used a background and/or links	10 points
Embed or Object tag using music/media	25 points
A table for some content	15 points
Any use of JavaScript from class examples	20 points
The use of an image map with 2 links minimum	10 points
All code MUST be indented professionally	10 points
